

PROGRAM OVERVIEW

Experience a FREE, FUN, LIVE Performance!
An exciting Science Enrichment Program for grades 3-5 that aligns with your state standards.

The Energized Guyz: Powered Up! is a play performed by two professional actors who entertain students in grades 3-5 through a series of improvisational comedy sketches, all while teaching about resources and energy conservation. Taking suggestions from the audience, the actors engage the students to help create the show that they see, forming a unique program with each presentation. Along with the in-school assembly, student workbooks, teacher guides, and online activities are provided to expand upon the educational content of the program.

Since 1978, The National Theatre for Children has dedicated itself to teaching young students about important and timely issues. As the largest touring theatre company in the world, our tested and approved methodology reaches two million students every year.

Students Will Learn:

- What energy and electricity are
- What energy resources are
- How energy is used unwisely
- How we can use energy efficiently
